

THE CHRONICLE

VOL. XIV. No. 30.

CROSSFIELD, ALBERTA, THURSDAY, AUG. 29th, 1921.

PRICE \$1.50 A YEAR.

WM. LAUT REPAIR TIME

Repairs for "Haying" and "Harvesting" Machinery should be looked after now.

Our stock is complete for both the

International, and John Deere

lines, and it will pay you to get your extras before some lines are depleted-

SECTIONS, GUARDS, LEDGER PLATES, must all be in good shape this year to cut the short grass -- you will waste time and horse flesh trying to use old ones.

Our stocks are larger, our service is better, our prices are a little lower and our
TERMS are CASH
on Repairs this year.

William Laut,
Groceries, Hardware, Implements, Harness.

J. A. VALIQUETTE, BARRISTER AND SOLICITOR

Calgary Office: 8104 First Street West.
Phone 34167.

At Hotel, Crossfield, Saturdays 10 a.m. to 1 p.m.

Name _____ Address _____

Disarmament

The invitation extended by President Harding to Great Britain, France, Italy and Japan to join with the United States in a conference to discuss and consider ways and means of bringing about world disarmament was hailed with joy by people of all nations. The whole world is weary of war—even Germany has had all the war she wants for a long, long time. Although the formal invitation to this conference on disarmament came from the United States, there is hardly any question but that British influence played a large part in it. It is even open to question whether the initiative in the matter did not come from Britain, where, however, it was realized that the extending of such an invitation by the United States would not be viewed with the same suspicion by other European powers as would be the case if Great Britain made the proposal.

Such a conference as has been proposed can hardly fail to be productive of much good, even though it may fall far short of actually achieving world disarmament. The millennium has not yet come, and it is too much to hope that all nations are ready to abandon all warlike forms of national defence. During the Great War it was a frequently used expression: "This is a war to end war." But conditions still prevailing in Europe and Asia seem to preclude the immediate possibility of disbanding all armies.

France, the victim of German invasion twice within the memory of many men still living, is far from being convinced that the day for maintaining an army of defence is passed. Russia is commonly credited with now possessing the largest army in the world, and under the present Bolshevik regime cannot be depended upon for one moment. Should all other nations disarm, dictators of the Lenin and Trotsky type might seize the opportunity to ride roughshod over Europe. Poland, rejoicing in its new-found freedom, with Bolshevik Russia on the one hand, and a resentful Germany on the other hand, is hardly likely to be willing to rely solely on Russian and German promises of good behavior. And is the world willing to trust Turkey?

But if complete disarmament is not yet possible, it ought at least to be possible to bring about a tremendous reduction in armaments and a consequent lessening of the probabilities of war, and its horrors should it unfortunately not be entirely avoided. With the ignoble surrender of the German navy, and its subsequent destruction, the greatest menace to the liberties of the world was removed. If the remaining naval powers—Great Britain, United States, Japan, France and Italy—can agree to put an end to the creation of larger and more powerful navies, smash up their submarines and put a ban on their further construction, a great advance step will have been taken, and an enormous reduction effected in the burden of taxation imposed on the people of these countries.

Again, if an agreement could be reached to eliminate the aerial services from use in war, a further advance step would be taken, the horror of future wars materially reduced, and untold millions of money saved. Otherwise, we are going to witness the expenditure of enormous sums in the perfecting of aerial machines of destruction, with each nation trying to out-do and out-invent the others. If in this age of marvellous inventions, the nations could be brought into agreement to reduce armaments to the old land soldiers of past ages, eliminate all recent inventions such as the submarine and airship from war use, and place the ban upon the use of all future inventions for warlike purposes, millions of money would be saved, the terrible magnitude of the last war prevented of repetition, and much of the fascination of war in its newer phases removed.

Greatly as we would like to see it, there is grave doubt of its being presently possible to bring about complete disarmament, and it is open to question, therefore, whether more would not be gained at the forthcoming conference on the subject if the matter of land disarmament was not dragged in but the efforts at disarmament confined to naval, aerial, and kindred aspects of modern warfare.

There is a certain fighting instinct in the whole human race that cannot be entirely eradicated, but it should be possible for the nations to reach agreements which would stop the use of the inventive genius of man for the wholesale destruction of his fellowmen, and which would result in the prohibition of all new mechanical contrivances which, if persisted in, would make the next war a war of annihilation, involving not only soldiers and sailors on active service, but the entire civilian populations of all countries engaged in the struggle.

CLARK'S Tomato Soup is such a treat -

Fine ripe tomatoes fresh from the fields give it their delicious flavour, and all you have to do is to heat and serve.

CLARK'S SOUPS are made in 13 different sorts, and include chicken.

Like all "Clark Good Things" the price is moderate.

Made from Canadian Farm Produce and sold everywhere in Canada.

France Receives Radio Photograph

Transmitted Across Ocean By Powerful U.S. Wireless Station.

Transmission of photographs and written documents in facsimile across the ocean by wireless has been accomplished. Two successful tests of this epoch-making invention have been made at the powerful naval radio station at Annapolis, a photograph and written message having been sent to Malmoe, the French radio station. The first test of the invention was the sending of a photograph of the recent Dempsey-Carpentier fight from the Annapolis station to France for reproduction in Le Matin, a Paris newspaper.

While the reproduction was said to have been fairly good, it was not as perfect as the engineers wished it to be. So another test was made.

This test was the sending of a facsimile, written message from C. V. Van Ande, managing director of the New York Times, to Le Matin, the Paris newspaper. Word came back that the message was reproduced almost perfectly.

Sure Protection For You While You Travel

You may find the water bad, some poorly cooked food may excite trouble, a draught from a car window may give you an ache or pain—a cold room or damp sheets may cause rheumatic twinges. Remember this—any pain that is caused by congestion yields rapidly to Nervine. When your stomach is sour and upset, just try the magical effect of twenty drops of Nervine in sweetened water. If cramps when in the dead of night, Nervine will fix these awful cramps in a hurry. Keep a 35 cent bottle of Nervine in hand—always.

On Schedule. Mistress—"Mary, how is it that the eggs for breakfast are sometimes so soft and sometimes quite hard?"

Mary—"Well, mum, I'm sure I don't know. I puts them in regular as the clock strikes eight, and it takes them out without fail when I hears the down train go by."

For Both House and Stable.—There is a good deal of similarity, physically speaking, between humans and the lower animals. Both are subject to many ailments arising from inflammation and all manner of cuts and bruises. Dr. Thomas' Electric Oil is an entirely reliable remedy for such ailments and mishaps in both human beings and the lower orders of animals.

True Word. "There are few things more tantalizing to a man," declares the Havensville Review, "than to go home with something on his mind and want to scold about, and find company there and be obliged to act agreeable."

Corns are caused by the pressure of shoes, but no one need be troubled with them long when so simple a remedy as Holloway's Corn Remover is available.

Strawberries In Cold Storage. Fruit growers in the low Fraser Valley, British Columbia, have put over 1,000 barrels of strawberries in cold storage to be held until the canners are ready to take them. The berries are packed in sugar and will keep in condition for preserving indefinitely.

The indications of worms are restlessness, grinding of the teeth, picking of the nose, extreme nervousness, often convulsions. Under these conditions one of the best remedies that can be got is Miller's Worm Powders. They will attack the worms as soon as administered and they pass away in the excretions. The little sufferer will be immediately eased and a return of the attack will not be likely.

For Western Farmers. This year the entire crop will put in the pockets of the Western Canada farmers the sum of about \$700,000,000. To produce this there was a tillage of some 30,623,000 acres, while 400,000 acres of arable land await the plough in the prairie provinces.

His Religious Belief. The census-taker had asked many questions and Mike was tired of answering them. "And what is your religious belief?" the suave census man continued. "Gee forgive me, but I'm an atheist," said Mike.

Convinced Tanlac Is Wonderful Medicine, Declares Miss Reed

"I am convinced that Tanlac is a wonderful medicine because it has been more than a year now since I took it, but it toned up my entire system so well that I am still in the best of health," said Miss Maie Reed, popular saleslady, residing at 406 Kennedy Street, Winnipeg, Manitoba.

"I dislike to have my name in the paper, but Tanlac has helped me so much that I actually feel it my duty to express my gratitude, so want everybody to know about my case. Nearly a year and a half ago, while I was living in Regina, my health broke down completely. I had rheumatic fever and for eight months was flat on my back in bed, unable to move an inch. I finally got up out of bed,

but was so weak I seemed to have no energy at all. My appetite was gone and instead of getting better I just worried along, getting worse, if anything. I could get no sound sleep and just felt miserable all the time.

"A friend of mine finally suggested that I try Tanlac, so I started taking it and by the time I had finished my second bottle my appetite was simply wonderful. I took four bottles in all, and all my strength and energy had come back to me and I was feeling like a different person. My health has been fine ever since and I haven't missed a day from my work. I can't say too much for Tanlac."

Tanlac is sold by leading druggists everywhere.

How Labrador Was Named

Portuguese Explorers Thought Natives Would Make Good Laborers. It is believed that Labrador was so named because Portuguese explorers thought the natives would make good laborers, or because of the labor required to make a living there. The name is connected with the old Spanish name of Labrador. The Labrador coast was discovered in the tenth century by Leif, the Norseman, but no explorations were made. It was again discovered in 1497 by John Cabot. Explorations and settlements were made and the peninsula was named.

LISTLESS, PEEVISH GIRLS

When a girl in her teens becomes peevish, listless and dull, when nothing seems to interest her and dainties do not tempt her appetite, you may be certain that she needs more good blood than her system is provided with. Frequent headaches and breathlessness and heart palpitation will confirm that it is anemic. Many mothers, as the result of their own girlhood experience, can promptly detect the early signs of anemia, and the wise mother does not wait for the trouble to develop further, but at once turns to the aid of a medicine with Dr. Williams' Pink Pills, which renew the blood supply and banish anemia before it has obtained a hold upon the system.

Out of their experience thousands of mothers know that anemia is the sure road to worse ills. They know the difference that good red blood makes in the development of womanly health. Every headache, every gasp for breath that follows the slightest exertion by the anemic girl, every pain she suffers in her back and limbs are reproaches if you have not your best thing to give your weak girl new blood, and the only sure way to do so is through the use of Dr. Williams' Pink Pills. New, rich red blood is infused into the system by every dose of these pills. From this new rich blood springs good health, an increased appetite, new energy, high spirits and a new zest in all her doings. Give your daughter Dr. Williams' Pink Pills, and take them yourself and note how promptly their influence is felt in better health.

You can get these pills through any dealer in medicine or by mail post paid at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

Prince To Send Winners.

The Prince of Wales was a notable winner with his exhibits of Shortcote cattle and Shropshire sheep at Bath and West and Southern Counties Agricultural Show, England, being the winner of most of the prizes. He declared his intention of shipping some of these farm animals to his ranch near High River, Alta., where there is already a fine blooded aggregation.

Strangled with Asthma is the only condition that seems to convey what is endured from an attack of this trouble. The relief from Dr. J. D. King's Asthma Remedy is beyond measure. Where all was suffering there comes comfort and rest. Breathing becomes normal and the bronchial tubes completely cleared. This unequalled remedy is worth many times its price to all who use it.

Yes, Luke, a woman can sharpen a lead pencil as quickly as a man can thread a needle.

Minaid's Liniment Relieves Neuralgia

The counterfeit coin may be lead, but it's hard to push.

The Polka Dot

Editor Finds Out Where Pattern Got

Although Lord Northcliffe, of the London Times, with a reputation for more knowledge than the average encyclopedia, was stumped of the meaning of "polka-dot," as applied to the cravat he was wearing ere he left Toronto for the west, the editor of the Drygoods Economist has unearthed the solution to the problem.

Three quarters of a century ago a Bohemian peasant dance called the polka, swept the old world and the new, creating as much of a sensation as the one-step and the fox-trot of today. Everyone talked of the polka. Just then some enterprising manufacturer got out a new style of dark silk fabric with contrasting spots or dots upon it. The rest was simple. The new fabrics, worn by the fashionable dancing the polka, became "polka dots," just as later we had merry woad hats, called Alice blue costumes, and so on. There were polka shoes, polka gowns and all sorts of polka things.

The Beaver Dam Ladies Aid will meet next Wednesday, August 31st, at 2.30 p. m. at the home of Mrs. Farquharson.

Pure and Wholesome Food Products

A very apparent effect of the work of the Department of Agriculture at Ottawa is the improvement that has taken place in the cleanliness and purity of the people's food. Especially is this true of the work performed by the Live Stock and Health of Animals branches. Better equipment at the stock yards has been brought about as well as improved facilities for transportation on the one hand, and, on the other, rigid inspection at the abattoirs and slaughter-houses insures healthy and wholesome meats for consumption. It is impossible to overestimate the value of the work that is thus being accomplished. At the camera's also cleanliness and wholesomeness are assured by the regulations that are enforced by inspectors and supervisors under the immediate control of the Health of Animals Branch. Eggs and poultry, under the Poultry division of the Live Stock Branch have been advanced in public estimation. In by-gone times householders always had certain suspicions of the eggs supplied at the breakfast table and used in cooking. They usually expected, one, two or three and sometimes more, in a dozen to prove unpalatable, and were rarely disappointed. To-day they buy and cook with confidence. The same is true of all other articles of food watched over by this and other departments. By legislation, adulteration has been checked and as nearly as possible suppressed. The capable work not only continues but is constantly being expanded and enlarged in scope.

Dominion Department of Agriculture, Publications Branch, Ottawa.

Diet Not Everything In Keeping Healthy

Your table may be loaded with food digestible and wholesome, yet you don't get strong. What's the trouble? The liver is lazy, stomach is over-loaded, the bowels are not active. Relief is quickly supplied by Dr. Hamilton's Pills. They make weak, sickly people strong and well because they keep the system clear of impurities. They regulate the system with Dr. Hamilton's Pills don't have indigestion or constipated headaches, they feel enlivened all over, because their system is kept in smooth running order. To revitalize and stimulate your whole being, to shake off lethargy and tiredness, nothing compares with Dr. Hamilton's Pills which certainly bring good looks, good spirits, good health, 25c all dealers, or The Catarhozone Co., Montreal.

The Homesteaders

— BY —
ROBERT J. C. STEAD

Published by Special Arrangement
With the Author.

(Continued)

He carried her to the tent and applied water to her forehead. As he was engaged in restoring her his hand fell on his gun. The barrel was hot. He raised her face to his, and kissed her again and again.

In the morning they found a few drops of blood on the grass at the top of the bank.

Harris and his wife allowed themselves no time for nerve-strain or the experience of their first night on their homestead. It was fortunate for them there was so much to do, and that they were thrown entirely upon their own resources. Their little store of money was running low, and they decided their house must be of the cheapest possible construction. Harris had already discussed his buildings with McCrae, who advised him to make use of sods, and gave general directions as to how to do so, and he now set about to put McCrae's suggestions into effect. Some fifteen miles north of the homestead was a valley in which grew trees of sufficient size for building purposes—poplars, cottonwoods, elms and oaks. Farther down the valley, at the head of a lake, was a saw-mill, where boards and shingles might be bought—if one had money.

So this morning, after caring for their cows, they hitched the horses to the wagon, took an axe, a saw, their gun, and a lunch, and set out for the valley, returning late at night with sufficient logs and poles for the framework of their house and stable. The next day construction was commenced. Four stout posts were set at end, enclosing a rectangle twelve by sixteen feet. The tops of the posts were connected by logs laid upon them, dovetailed at the corners after the fashion of woodmen, and held in position by wooden pins driven in lengthwise along the centre, to form a ridge. Another stout log was laid and the whole framework supported by the posts, among which were two on the east side to enclose the door. Small poles were then placed on end, sloping inwards, and resting against the plate-logs. Similar poles were laid from the plate-logs to the ridge-pole to support the roof.

Harris found a southern slope where the frost was not enough to admit of him ploughing some sods. He knew he would not get as good a sod here as later in the season might be found in some low-lying spot, but his first consideration was to get some kind of permanent shelter. So he ploughed the sods, three inches thick and fourteen inches wide, and cut them into two-foot lengths with his axe, to the end and injury of its cutting edge. These sods were then built into a wall like bricks, resting against the framework of poles, from which, however, they were separated by a padding of grass, which Harris cut in a slash with his scythe, and small willows from the ravine. This mattress of grass and willows prevented any earth shaking through into the house itself. A framework made of a heavy log was inserted in the south wall to leave space for a window, which should be bought when the family finances could afford such luxuries. For the time being it would be left open in fine weather and covered with canvas when the elements were grim and unruly. The rag carpet, when no longer needed as a tent, would be draped in the doorway, pending the purchase of boards to make a wooden door.

W. N. U. 1381

For a roof, grass was laid on the poles and covered tightly with sods. Then Harris found a sticky, yellow clay in the side of the ravine, and two or three inches of this he spread carefully over the sods, like icing on a great cake. The grassy clay soon hardened in the sun, and became so impervious to water that the heaviest rains of summer made no impression upon it.

When, save for the missing door and window, the framework of his house stood in the centre and admired, it was absolutely the product of their own labor, applied to the resources as the prairie provided. But it was warm and snug, and, as they later on learned, the wall and roof of sod were almost perfect non-conductors of either heat or cold. The floor was of earth, but Mary Harris knew the difference between earth and dirt, although the words are frequently confounded, and her house was from the first model of cleanliness and order.

By this time the snow was all gone, except in north-facing cracks along the ravine, and the frost was out of the soil in all places deep enough to admit of ploughing. As the stock was taking no harm from the open air, thanks to the shelter of the ravine, Harris decided to delay the construction of his stable until after seeding and to proceed at once with the ploughing of his land. He had already made a trip to Arthur's for seed grain, and to borrow a couple of sections of drag harness. With it all, by the middle of May he had sown fifteen acres of wheat, and notwithstanding a heavy snowfall about the 23rd, by the 1st of June he had added ten acres of oats. With his help Mary had planted a small garden of potatoes and vegetables, and a few flowers were springing up at the door of the house.

It was a life of hard, persistent work—of loneliness, privation and hardship. But it was also a life of courage, of health, of resourcefulness, of a wild, exhilarating freedom found only in God's open spaces. They had started to know the anatomy of a field—the cheery gopher; the silent, over-industrious badger; the skunk, challenged monarch of his immediate circle; the sneaky coyote, whose terror is all in his howl; the red fox, softly searching amid the grass for the nests of ducks or prairie chickens; and the rabbit, curious but always gracefully elusive. Then, there was the waterfowl, infinite in number. The stuffed ducks on the dinner-table were limited only by the amount of powder and shot which Harris cared to spend on the pond at their door. At night, when the horses had been harnessed and dusk was setting in, he would slip his gun under his arm and walk down among the trees. It was necessary only to wait. Two graceful forms, feeding under a grassy bank, hearing a slight rustle above would shove with quick, silent stroke into the supposed safety of their native element. Harris would peer through the dusk for the brighter markings of the male, for only a game-winner about the female of the nesting season. Then, as they separated a little, his gun would speak a soft splash of water; a sharp whistle of rapid wings cutting the air; a form, padding an uncertain path, and a single, very strange, unanswerable longing of the great plains stole down upon them, and they knew that here indeed was life in its fullness—a participation in the infinite, indefinable, but all-embracing, everlasting.

Exact Copy of Wrapper.

ty, wrapping field and ravine in a riot of silver, the strange, very strange, unanswerable longing of the great plains stole down upon them, and they knew that here indeed was life in its fullness—a participation in the infinite, indefinable, but all-embracing, everlasting.

CHAPTER V.

The Shores of the Infinite.

The summer was a season of great activity and development. Harris did not sow any crop after the 1st of June, but applied himself then to the construction of his stable, which was built after the same fashion as the house. The shelter of its cool walls brought of his will to hear upon soil which had come down to him through the ages fresh from the hand of the Creator. The blackbirds followed at his heel in long, respectful rows, solemnly seeking the trophies of their chase, might have been incarnations from the unrecorded ages that had known these broad

The prairie flowers, too, were a never-ending delight to the heart of the young woman. She knew some of them by name, but many were peculiar to the prairie. The first few warm days of spring had clothed all the wilderness with a magic carpet of pale-purplish blossoms, and the advancing season brought new blooms to view with every passing week. On Sundays, when there was total relaxation from their regular labors, the two, arm in arm, would stroll along the bank of the ravine, or walk, ankle deep in strawberry blossoms, far over the undulating plain to the west. Returning, they would find their way to the edge of the stream, where, in the shallow crossing, the sickles would dart in all directions in panic at their appearance. Here they would sit and listen to the gentle murmuring of the water, while fleecy clouds mirrored themselves in its glassy depths, and plovers ran whistling up and down the bank, and a meadow-lark sent its impish challenge from a neighboring bush. And at night, when the moon rose in wonderful whiteness and pur-

False Claims.

WE hope there is no Mother who thinks she can treat her sick baby without calling in a Physician, or with remedies that she uses for herself.

Most Mothers know that Baby requires remedies especially prepared for babies, yet there are some who think that what is good enough for them is good enough for Baby, and it is to these Mothers we appeal to give nothing to their babies that is not specially prepared for babies or recommended by their Physician.

False claims may kill, but false claims can never restore your child.

For over thirty years Fletcher's Castoria has been aiding in the reduction of the deaths among infants as Mothers have become more and more acquainted with it. Always keep it in the house.

Children Cry For

Fletcher's
CASTORIA

Are You Prepared?

A doctor in the house all the time would be a good idea. Yet you can't afford to keep a doctor in the family to keep baby well or prevent sickness. But you can do almost the same thing by having at hand a bottle of Fletcher's Castoria, because it is a wonderful remedy for indigestion, colic, feverishness, fretfulness and all the other disorders that result from common ailments that babies have.

Fletcher's Castoria is perfectly safe to use. It is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrup. Children cry for Fletcher's Castoria, and mothers recommend it because they have found it a comfort to children and a mother's friend.

If you love your baby, you know how sweet it is to be able to help baby when trouble comes. You cannot always call upon a doctor. But doctors have nothing but good to say of Fletcher's Castoria, because they know that it can only do good—that it can't do any harm—and they wouldn't want you to use for baby a remedy that you would use for yourself.

MOTHERS SHOULD READ THE BOOKLET THAT IS AROUND EVERY BOTTLE OF FLETCHER'S CASTORIA

GENUINE CASTORIA ALWAYS

fields for chase and slaughter, but never for growth and production. The era of the near vision, demanding its immediate reward, had passed away, and in its place was the day of faith for without faith there can be neither seed-time nor harvest.

(To be Continued)

Huge Timber Resources.

Huge resources in timber exist in Canada, of a thousand billion feet estimated to be standing all over Canada, more than half are to be found in the west. With reforestation this should be perpetual.

Allies Will Send Relief To The Starving Russians

Lloyd George Has No Admiration For Soviet Government, But Will Act on Humanitarian Grounds.

Paris.—The United States ambassador took part twice in the sessions of the Supreme Council, once in replying to Premier Lloyd George, but he agreed that the traditional policy of the United States gave traders the right to sell arms to either belligerent in the Near East, and again, in replying to enquiries by the prime minister respecting Secretary Hoover's Russian relief plans.

M. Briand, the French premier, began the discussion of the Russian famine by saying that the Russian people who had fought with the Allies in the beginning of the war might justly look to them now for help.

"I propose that all the Allies join with the United States and the other nations who are interesting themselves in the administration of relief through Red Cross societies and other private sources," said M. Briand.

"I heartily agree to this," exclaimed Lloyd George, "but I wish to point out," he added, "that such efforts could not reach many of the sufferers. The Red Cross cannot perform the miracle of the five loaves

and two fishes. Relief must be organized immediately on a great scale not only for the sake of Russia, but for the sake of the world, because typhus, cholera and other plagues incident to famine would cause more losses than the last war."

"I have no admiration for the Soviet Government," Lloyd George continued, "but relief is impossible without its co-operation, inasmuch as it controls transport and all of the official machinery. No one could move about Russia without its permission. I think for this purpose, and for this purpose only, the Allies should make some arrangement with the Soviet Government."

Lloyd George said he had been informed that some of the Russian provinces had surplus grain, but the peasants would not release it except in exchange for goods which they required. He suggested that the Supreme Council consider at once whether steps could not be taken to obtain grain in this manner for the famine area. The question was not a political, but a humanitarian one.

"When your neighbor's house is burning," he concluded, "you don't ask questions, but try to save it."

To Unify the Laws Of the Provinces

Ottawa.—An attempt to unify the laws of the various provinces, with the exception of the province of Quebec, which has been under consideration by a committee for some time, will be reported upon at the annual meeting of the Canadian Bar Association which opens here on September 6, and continues until September 8. Each province, with the exception of Quebec, is represented by a commissioner. The exception on the part of Quebec is due to the radical difference in its insistence on the maintenance of its civil laws granted under the B.N.A. Act.

Soldier Settlers Have Good Crops

Success of Community Settlements Exemplified in Indian Reserves.

Winnipeg.—Soldier settlers in the northern parts of the three prairie provinces will harvest from 20 to 35 bushels of wheat to the acre, according to Captain L. B. Boyd, a federal inspector of the Soldier Settlement Board, who has been here attending a conference of district supervisors.

Returned soldiers who have settled in communities throughout the west have done remarkably well from every point of view, Captain Boyd declared. The outstanding success of community settlements, he stated, is exemplified in the Indian reserves thrown open to the Soldier Settlement Board. Notable among these are the Riding Mountain, Piapot, Porcupine and Pouce Coupe reserves. In every one of these places community settlements have been established, with an average of 80 acres per settler under cultivation. The population of these settlements range from 200 to 600 people.

Six U.S. Prisoners Released.

Riga, Latvia.—Six United States prisoners in Russia have been released by the Soviet authorities and have arrived at Narva, Estonia, in fair condition. The six were Emmett Kilpatrick, Weston Bestes, William Flick, X. B. Kalamitiano, H. J. Lamarc and Russell Fallinger.

The Life of Ne-Gua-nan-I-sew

By O-GE-MAS-ES (Little Clerk).

(Copyright)

(Continued)

About this time, now in the nineties, a young colored doctor from Chatham, Ontario, had settled in Kinshtino, some thirty miles west of my homestead, and was practising his profession there and visiting the scattered settlers with much success. This was news for me and I drove up and called on him at the first opportunity, and we soon became fast friends. He was much interested in the Indians and when I told him of the deaths of Ne-gua-nan-i-sew's children and described the symptoms, he made me promise that if another child was born to this couple it was to be brought up to him for examination.

On my next visit to Neshlow and his poor sad wife they listened with the greatest eagerness to my tale of the new doctor, and it was rather amusing when I described his color. Ah, they said, if a white doctor's medicine is strong, why a black doctor's must be stronger. However, they promised faithfully if a few babies came they would surely follow my advice.

A year or so elapsed and in they came with a fine little baby girl tied in the Moss Bag and resembling her mother very much. Both were anxious to see the new medicine man, so we all went up to Kinshtino, I going as interpreter. After a careful examination the doctor gave certain instructions and these they promised faithfully to carry out. Then in three months time, and in fact every three months for at least a year, they were to bring the babe for another medical examination. At about the age of two the doctor performed a slight operation for tubercular gland.

The child threw, the parents were immensely grateful, and this girl baby gradually developed into a fine handsome young woman who went to Emmanuel College. She was the pride and delight of her parents and through her efforts they both became converted to Christianity. In the meantime, two other children were born to Neshlow and being duly treated by Dr. Shadd, grew up fine youngsters. A happier, more contented Indian family you could not find, but alas, the sequel of this true tale proves that in the midst of life we are in death.

The season was early fall, following an extremely dry summer, and Neshlow and all his family were camping in the hills south of Ethelton. The country was broken and brule with a tremendous growth of grass and much dead old bottom. For days the atmosphere had been smoky. Suddenly a heavy gale of wind arose and Neshlow finally decided to make for the open country, but in every direction they tried to proceed, fire or dense smoke headed them back. Finally, in despair, he set all hands to make as big a clearing as possible, also to dig a hole (axes the only tool) to shelter them if the fire swept over the camp. Then he hobbled and threw his two ponies and covered their heads up with a blanket. How they all worked in spite of the awful heat and suffocating smoke, then with in rear the actual fire was on them and one by one he saw his dear one's perish, reckless of his own life he clasped them in his arms to extinguish the burning garments, but his loved wife, his brilliant daughter and the two young children all perished.

When a rescue party arrived he was still conscious, though very badly burned. They insisted on taking him down to the doctor, but his wish was to die and join his loved ones, the quicker the better.

I was not present when they brought the poor maimed child of nature into Dr. Shadd and laid him on a couch. After a short examination he pronounced the case hopeless, and when they told poor Neshlow this, he thanked God and calling his friends who had rescued him he dictated his last wishes. He asked that sufficient of his goods be sold to meet his debts, and sent a special message of goodwill to me. Then, folding his poor burnt arms across his chest, and with a cheer "Goodbye, doctor," thus perished Ne-gua-nan-i-sew, a gallant Indian gentleman.

Fortunately some years before the date of the wiping out of this family, old South-Wind and his wife had died so they were spared much grief.

Indian Prevention of Bush Fires.

Old South-Wind was my first Indian friend in the Stony Creek country (now McLeod district), and not only selected my first location, but gave me much kind and sound advice as to, me, it was a new district. His forefathers, for generations back, had made this district their hunting grounds and he pointed out to me with pride the fact that all the first growth timber was still standing untouched by fire. When asking him what I should do in regard to this preservation of the green woods (which of course meant saving the fur), he replied as follows:

Just as soon as the snow goes off in the spring and the grass on the ridges is dry, put out your fires. The snow is still in the woods and no harm will result. Then later on as the hay swamps dry up and you have the ridges surrounding them burnt off, why do the same to the hay.

I followed the old Indian's advice for years to 1893 without losing a stick of green timber, but in the year 1893 a number of settlers came in and when I was burning the ridges in the spring of 1894, one of these men, a man from North Dakota, warned me that he had been appointed a fire guardian and that I would be pulled if I did not stop putting out spring fires. I tried to show the new men the folly of this but without success, so for two or three years the old grass collected until it formed a mat on the ground over a foot thick, then one of our number let a fire out in a dry fall. Many of these new settlers lost their buildings, several barely escaped with their lives, and two young Indians perished in the hills. Millions of feet of good green timber were burnt, and some thousands of acres of black soil were burnt off clean down to the clay sub-soil and, naturally, the fur-bearing animals were wiped out.

This is the Regret I may have suited southern ranchmen but it was a positive evil in this country where more grass grows on one acre than on ten or twenty in the south. Our legislators should have had old South-Wind at their councils.

We few settlers became exhausted in trying to check this awful fire so appealed to the Mounted Police for assistance. Help was promptly and effectively given, as usual, with that noble body of men.

Fire Raging in Russian Oil Wells

Flames Cannot Be Extinguished and Loss Will Be Disastrous.

London.—Fires are raging in 18 oil wells in the suburbs of Batum, the great oil centre in Asiatic Russia, according to advice from Rival, Esthonia, by the Central News Agency here.

There appears to be no means of extinguishing the conflagration, the message added, and the loss of oil will be disastrous. The disaster will be more keenly felt on account of the famine and cholera in that district and the consequent scarcity of labor, resulting in scanty supplies of coal and firewood for the winter, the message said.

Secondhand experience is almost as good as new, and it costs less.

Ample Harvest Help

Winnipeg.—With approximately 25,000 harvest hands required for Manitoba and Saskatchewan already in the west, it was decided at a meeting of employment officials here to notify the railway officials that further excursion trains from eastern points should be held up, pending a survey of conditions. Whether the west has sufficient farm labor or not will be decided by the next day or so. Surprise was expressed by local employment officials at the expeditionary manner in which the railways had dispatched so many harvesters from the east.

Loyalty of People of Dominion

King George Is Grateful For Work of Premiers at Conference.

London.—His Majesty King George in his reply to the address from the Imperial conference, emphasizes the fact that he had stirring and ineffaceable proofs from the peoples of the dominion of their loyalty and devotion in the enthusiastic and touching receptions invariably given on the several occasions of his visit to different parts of the world where the British flag flies, proofs which had been renewed in the remarkable demonstration of welcome and goodwill to the Prince of Wales during his visit of the past three years. Furthermore, where could one find such ample testimony to their common allegiance to empire and sovereignty as in their noble self-sacrifice during the four and a half years of the World War?

His Majesty added: "I followed with keen interest the deliberations of the conference. These meetings and the exchange of views between ministers of the great communities which they represent, upon the many problems affecting the common interest of the British peoples, are essential to the unity and well-being of the empire and the general peace of the world. Every facility must be given for such periodical meetings, and to ensure this, we look confidently to men of science and research to discover an improved means of inter-communication between all parts of the British commonwealth.

"I know the work of the conference has been strenuous, entailing severe demands upon all concerned, but their time was well spent in advancing further along the road of progress and development.

"I heartily thank them, on my own behalf, and that of the Queen, for the address. We wish Godspeed to those who are leaving England and a safe and happy return to their respective homes and families. More than ever do we follow with feelings of affection, the welfare of our people at home and across the sea."

W. N. U. 1381

Quebec Town Destroyed by Fire

Hundreds of People at Aylmer Are Rendered Homeless.

Ottawa.—Fire of a disastrous character, fanned by a strong wind from the southwest, swept Aylmer, Que., this afternoon, and left in its wake a parched and blackened ruin of what was formerly a quiet and picturesque town.

At least one death was caused by the fire, seven hundred persons were rendered homeless and the property loss is estimated by Mayor Nash, of Aylmer, at \$750,000. Most of the principal buildings in the town were razed by the flames and the homes of some 125 families lost.

Locate Rich Iron Prospect

Find Near Sault Ste. Marie Most Promising in Canada.

Sault Ste. Marie, Ont.—What is characterized as the most promising iron prospect in Canada has been located 67 miles north of Sprague and six or seven miles south of the first reserve in the Blind River country, 100 miles south of the Sault, by Col. J. A. Currie, of Toronto, M.P., for North Simcoe, and Archibald Campbell.

The float was located about a mile and a half from the site of the discovery, and natives of the vicinity who were familiar with the iron traces in the float, maintained that it had come down from the Hudson Bay district.

Fire Visits Strathclair.

Strathclair, Man.—A Chinese laundry, a butcher shop, a general store, and a hardware store in the business district of Strathclair have been destroyed by fire. The loss will be about \$25,000, partly covered by insurance.

Starting to Go Up—Hang On to Your Hat!

Agricultural College Training Is Essential To Highest Success With Farming

There was time in this country when the virgin soil was capable of producing crop without fertilizing; when any kind of crop could be produced with little cultivation; when the variety of crops grown was small; when the livestock industry and its many problems were practically non-existent; and when man's needs were comparatively few and simple. In those days a man did not require much education to be a farmer.

It may be true still that the practical farmer who has been raised from boyhood on the land and is enthusiastic and intelligent about his work may succeed better than the man who has learned all he knows about farming from books or college lectures. But this is no argument against agricultural education or the college course for the would-be farmer who is ambitious and wants the best preparation he can get for his life work on the farm. To such a young man the agricultural college makes a strong appeal and to such the college offers the training and knowledge that is essential to the highest success in this avocation.

There are some who are very skeptical as to the value of a college education, but they are not usually found amongst those who have shared its privileges. The man who values education solely for its ability to produce additional dollars may look at some underpaid scholar and as he contrasts him with the self-made millionaire may conclude that education does not pay, but the scholar in his humble dwelling with his well-beloved books, knows that he has something which all the millionaire's millions cannot buy. There is a satisfaction in getting close to the heart of things which every genuine student enjoys, and the wider vision which proper training insures has a value which cannot be estimated.

It will probably be found to be true that the college-trained man's earning capacity is increased by his college training to an extent which more than repays the heavy early outlay; but this does not seem the essential argument in pleading for college education. The real value of education cannot rightly be measured in material things. It is true that college may give us Marquis wheat, the Panama Canal, the aeroplane, and most of the discoveries in medical science, but, after all, the essential thing is the alert, enquiring mind, and when this is secured all kinds of startling discoveries follow as a matter of course.

No man knows what latent powers lie within him. College but gives him a little better chance to develop those powers. Sometimes his friends have profound disbelief in a man and his education, if secured at all, is secured in downright defiance of all his best friends. Well is it for the man whose mind is not strong enough to drive him forward in face of such opposition! "Don't be a fool, John," has been about the only kind of encouragement some young fellows have had in their struggle for an education. All honor to the men who in such circumstances have fought their way to higher educational advantages.

Dover-Calais Tunnel.

Work will be started on the wall on the Dover-Calais tunnel on both sides of the Channel and when it is completed, inside of ten years, travellers will be able to go by train from London to Siberia and the Far East, or to Bagdad on the Persian Gulf without any difficulty in comfortable sleeping-cars, eat their meals in the diners and watch the camels in the desert going sauntering by their big loads as they have done for thousands of years.—New York Times.

44,000 Vehicles a Day.

What is the busiest thoroughfare in London? Most people would say Piccadilly Circus, Trafalgar Square, or the streets converging on the Mansion House. They would be wrong. The greatest amount of traffic is at Hyde Park Corner, where something like 44,000 vehicles pass in the course of a normal twelve-hour day. Piccadilly Circus comes next with 37,000.

W. N. U. 1381

Woman In Trance For Five Years

Treatment Has Restored Her to Apartment Good Health.

The remarkable case of a woman who remained in a trance five years, and the unusual methods by which she was restored to normalcy, were related recently by Dr. Pierre Janet, leading French neurologist, at the annual meeting of the American Neurological Association. This was the first time that Dr. Janet had made public the unusual case, which was extremely interesting to the neurologists because of the extraordinary period in which the woman was apparently unconscious.

Dr. Janet said that the patient a woman of 21, had first had lapses of memory when she was 13, but had quickly recovered from them. During the war she suddenly became unconscious. Forced feeding was resorted to and for many months her mental faculties were apparently dormant.

Once the hospital in which she was lying was bombed by German airplanes, and a bomb exploding just outside the window did not cause her to move a muscle. Dr. Janet was finally able to hypnotize the patient and learned that she had subconsciously retained mental impressions of some of the incidents of the hospital.

Later she was taught to eat by leaving food beside her bed at night. In the end Dr. Janet said, he established the patient's connection with the outside world by establishing a system of clandestine correspondence with her. Letters, Dr. Janet said, which he left for the woman were soon answered with regularity.

From this time, he said, she began to take an interest in outside affairs, and in a comparatively short period the regained apparently complete mental control of herself. She is now, Dr. Janet said, in apparent good mental and physical health.

No Degrees In Honesty

Men Are Honest In Everything Or Honest In Nothing.

A \$10 bill is either good or bad. A man is either honest or dishonest. If he is honest he will not cheat or steal or take undue advantage of another man under any circumstances. If he is dishonest his cheating and stealing will be limited only by his opportunity or his timidity.

The difference between big thieves and little crooks is sometimes a difference of courage. The little thief does not steal continually because he is afraid to. The big thief has less timidity—or less imagination, and steals whenever he has a chance. But one is just as dishonest as the other. And often the little fellow is the worst, for he adds cowardice to his crookedness.

A full grown man or woman, trained in life, who does a dishonest act will do another under the same circumstances. A boy or girl, lacking this training, will sometimes become straight with the growth of intelligence.

For the ancient adage about honesty being the best policy is so apparent to common sense that even people who are mentally crooked often turn honest and remain honest, merely because more profit can be had in that manner of life.

It is well to apply the honesty test to yourself, and change your method if you find that under certain circumstances you would take advantage of a fellow creature—legally or illegally. It is well to drop friends that you catch cheating at cards, or at golf, or in business. For the cheat is a particularly despicable form of crook, and deserves no friends whatever.

Never think that a man or a woman is a little dishonest, or dishonest about some things and honest about others.

They are 100 per cent honest or not honest at all. They are honest in everything or honest in nothing. If they are honest, as we believe most people are, they are worthy to be trusted. If they are dishonest, knowing what dishonesty means, the wider berth you give them the better it will be for you.

Likes Irrigated Land

South American Is Impressed With Possibilities of Alberta Irrigated Area.

In an interview with a representative of the Calgary Herald, Paul D. Sheridan O'Leary, of San Sebastian, Nicaragua, who is touring Western Canada expresses his satisfaction with this country. "I must say that Southern Manitoba impresses me most as the country in which to grow wheat on a large scale," Mr. O'Leary told the reporter, "but the land under irrigation in Alberta is what pleased me most from an intensified farming standpoint. I have several small commissions as well as the large one and am recommending my friends to Alberta irrigated land. The people will gradually come to farm smaller tracts of irrigated land, and they will get much more out of them. Properly farmed, an eighty-acre plot of irrigated land will pay more than a quarter section not so well looked after. Your irrigated section east of Calgary is a gradually increasing source of prosperity."

Lady Seeks Sunken Gold

Miss Foster of England Managing Her Own Yacht.

In her 15-ton motor yacht, Miss Knowles Foster, F.R.G.S., set off from London for the coast of Norfolk to search for two wrecks said to contain Australian gold. Anyone can buy the wreck from the Admiralty and salvage it for themselves. The Admiralty fix the time limit during which the wreck must either be cleared or blown up and in addition they claim half the salvage. Miss Foster navigates her yacht herself and is studying for a master's ticket. The crew consists of a steward and two divers. Miss Foster's agreement with the Admiralty is that she must carry out her adventure to the bitter end, even if it costs her her last penny.

Switzerland in Canada

The Home of a Swiss Guide at Edelweiss, B.C.

A very successful attempt at introducing the Swiss-chalet type of architecture into the Canadian Rockies has been carried out at the village of Edelweiss.

Miniature chalets of the Alps here blend in with the Canadian landscape in the side-hills above Golden as though part of it. "The Swiss-line" of the little cottages themselves are further enhanced by the use of rustic bridges and handrails leading up to the cottages tiering one above another ever higher in true "excelsior" fashion.

It is customary in the very nature of his swift passing for the tourists sitting by the window of the speeding "through train" to catch only a glimpse of this hybrid among villages.

Yet, the natural human-interest felt in the real Swiss guide at Lake Louise who so safely conducts you to the Ten Peaks and by other of those entrancing "Trails" focussing around "The Lakes in the Clouds" must often have aroused your curiosity as to where these wonderful mountaineers live when off duty. And you must often have found yourself speculating as to the home-life of the "Guide" so calmly and with such perfect assurance playing the hazardous double-roll of "Trail-Maker" and "Trail-Master."

This foreigner is a specialist. And the fact that his knowledge of our own mountains is so much greater

Timber Wealth Of The Prairie Provinces Of Great Importance

It seems a contradiction in terms to speak of timber or the lumber industry in regard to Manitoba, Saskatchewan and Alberta, that vast territory so widely known as the prairie provinces. But it is the term which is at fault for the appellation is a misnomer and only the southern section of these provinces, that area first penetrated and settled, can strictly be called prairie, and even so this apparently treeless vast is relieved by general clumps of brush, by the wooded banks of river and stream, and by the density of forestation on its rocky eminences. When the northern boundary of this prairie expanse is passed, a fine luxuriant parkland is pierced with bush, at first light and scattered, but becoming thicker and denser as progress is made northwards. Finally, in the north, heavy woods and swamps are encountered containing much merchantable timber and pulpwood.

With the vast stands of merchantable timber in other provinces existing in close contiguity to the railroads and other transportation means, and with the comparatively recent settlement of the western provinces and the almost exclusive attention paid to agriculture and its many phases, not a great deal of attention has been paid to timber in the west, excluding, of course, British Columbia, where the industry is of prime importance. But in the light of the universal talk of conservation of forest wealth, the heavy toll put upon other Canadian forest areas by reason of the wasteful methods of other countries in the past in regard to their own forests, with the possibility of their depletion or, indeed, exhaustion, if the most rigorous methods of preservation are not

extended, it will not be long before greater attention is paid to the more remote wooded areas of the prairie provinces and these areas be called upon to help out in the situation. A future awaits the prairie provinces at the hands of the lumberman and pulpman.

It has been estimated that there are about 500,000,000 acres of forest lands in Canada about half of which is covered with merchantable timber, and the value of the forest products in 1918 was \$279,548,011. The prairie provinces contain about eight million acres of commercial timber lands, 5,400,000 acres of which are in Alberta, 1,920,000 acres in Manitoba, and 750,000 acres in Saskatchewan. In addition to this, there are large resources of pulpwood upon which no really accurate estimate has been made.

Manitoba is about seventy per cent wooded, and in this province the principal heavily timbered sections have been set aside as government forest reserves located west of the Red River in the southern part of the province. On the upper plateau of this section are spruce, jack pine and tamarac, in the coniferous zone, oak, basswood and white pine. The principal trees in order of present importance are white spruce, black spruce, jack pine, tamarac, balsam fir, aspen, cedar, but a great much of which is being used, elm, green ash, white oak, balsam, balsam of Gilead, black ash, basswood, Manitoba, maple, cotton-wood, red ash, and mountain maple.

While the extensive commercial use has been made of these woods from the lack of exploitation due to conditions already noted, they possess a potential worth commercially of some magnitude, and have already been extensively made use of locally. The province, it has been estimated, contains about 1,920,000 feet of saw timber, or 4,000,000 feet B.M.

Alberta is estimated to contain about twenty-one billion board feet of saw timber, the principal species being spruce, lodgepole pine, Douglas fir, poplar balsam fir, white birch and tamarac. Fires have wrought destructive havoc in the forests of the province much of which has been devastated and on the burnt-over areas the reproduction is mainly lodgepole pine with areas of poplar and birch. Lumbering operations are principally confined to the Rocky Mountains. The service which contains all the lumber at present merchantable in Alberta. There are nearly eight hundred square miles at present under license on permits issued prior to the establishment of the reserves.

In Saskatchewan the area actually timbered with merchantable trees is about 750,000 acres, the country to the northeast being heavily timbered with spruce, tamarac and jack pine. Prince Albert is the centre of Saskatchewan's lumber industry.

Though the timber trade of the prairie provinces has not as yet made a startling record in Dominion figures, it is provincially of a high value and of great local importance, and the economic history of the great plains would have been very different but for their possession of the northern woods. Whilst little, if any, of the timber cut ever gets beyond the borders of its native province, there is a local market whose demands are increasing yearly. The prairie provinces are showing a steady expansion perhaps unprecedented in the history of new countries and their cities and towns, and, above all, their agricultural areas, have need of lumber in ever increasing quantities.

Chinaman's Queer House.

In the little town of Chateau, B.C., there is a house, the walls of which are bottles laid in mud somewhat after the manner in which bricks are laid in mortar. The necks of the bottles are on the outside of the walls. The roof is made of poles covered with earth shingled with tin cut from old coal oil cans. The house was built and is owned by a Chinaman.

Two first edition copies of Bunyan's "Pilgrim's Progress" have just been sold in London for \$10,000.

Give your local merchants a chance. Buy at home.

World Happenings Briefly Told

Chicago is experimenting with a wireless telephone system connecting all fire and police stations.

Transportation rates on livestock on the Pacific Great Eastern Railway will be reduced about 35 per cent. immediately.

For the first time in many years the water in Lake Superior is warm enough to permit comfortable bathing at Duluth.

Germany owed the U.S. up to April 20 last \$24,744,511 for maintenance of American troops on the Rhine.

"Silver Threads Among the Gold" ballad, with half a century of popularity, is still earning \$5,000 a year in royalties.

Secretary of Labor Davis says the U.S. Government can save \$50,000 annually by buying plain pencils without rubber tops.

Mrs. Wilbur Smith, 84, of Mantua, N.J., is cutting her third set of teeth.

A printing plant for counterfeiting Government doctors' liquor prescription blanks was seized at Boston.

The sum of \$53,875 has been collected in Port Arthur for infractions of the Ontario Temperance Act.

Other prohibitory measures since the closing of the bars in 1916.

Treasures, three hundred feet high and seven hundred feet long were seen off the Grand Banks of Newfoundland by passengers on the steamship Columbia which arrived at New York recently.

Twenty-four people have been reported drowned in serious floods which are raging throughout the prefecture of Yamagata. Five thousand houses have been submerged and forty bridges destroyed by the floods.

A trapper named Smith and another whose name is unknown, are believed to have been lost in the rapids of Black River in the Arctic Circle. Don Cadson, trapper from Rampart House, brought the news of the disappearance of the two men when he came to Dawson.

OF INTEREST TO WOMEN

This is a Short Letter, But It Proves the Reliability of Lydia E. Pinkham's Vegetable Compound.

Bethwell, Ont.—"I was weak and run down, had no appetite and was nervous. The nurse who took care of me told me to try Lydia E. Pinkham's Vegetable Compound, and now I am getting strong. I recommend your medicine to my friends, and you may use my testimonial."—Mrs. W. J. Brady, R. R. 2, Bethwell, Ont.

The reason why Lydia E. Pinkham's Vegetable Compound is so successful in overcoming woman's ills is because it contains the tonic, strengthening properties of good old-fashioned roots and herbs, which act on the female organism. Women from all parts of the country are continually testifying to its strengthening, beneficial influence, and as it contains no narcotics or harmful drugs it is a safe medicine for women.

If you want special advice write Lydia E. Pinkham Medicine Co. (confidential), Lynn, Mass. Your letter will be opened, read, and answered by women only.

Alberta Ships Horses

Trinidad Business Firm Ordered Them For Driving Purposes.

A trial shipment of Alberta horses is now on the way to Trinidad, where they are being sent on an order from a business firm there which wants them for driving purposes. Twenty-three animals, of small build, standing from fourteen to fifteen hands in height and weighing from 700 to 1,000 lbs., bought in the vicinity of Calgary, are being shipped as a first consignment, and a second lot to make up a total of fifty will follow later.

The shipment is in charge of J. D. Smith, of the department of agriculture. He will ship from Halifax by one of the West India steamer lines, and after delivering the animals to their buyers in Trinidad will spend some time looking into the future horse market there and at other points in the Indies. If Mr. Smith's investigations are satisfactory, it is likely that other shipments from Alberta will be made in the near future.

That Dry Cough Is Bronchitis

If neglected, it will weaken the throat and perhaps reach the lungs. Nothing surer to help you quickly than the healing soothing vapor of Catarrhose. Its action is magical, every congested spot is healed, irritation is soothed away, phlegm and secretion are cleaned out, all symptoms of weak throat, Catarrh, Bronchitis disappear. Catarrhose is a genuine, scientific preparation. Sold everywhere in three sizes, 25c, 50c and one dollar for a complete two month treatment. Prepared by the Catarrhose Co., Montreal.

Australia Gets Strange Weather

Snowstorm Is Unusual Experience for People of Antipodes.

A Reuter cable from Melbourne says that the entire state of Victoria has been experiencing very heavy weather recently, with a considerable snowfall, followed by a great deal of rain, even in Melbourne, where such conditions are most unusual. Several ocean vessels are overdue and there is some anxiety on account of coast vessels.

Lieut. Parer, of the Australian Air Force, who, with two companions, has been attempting a flight around Australia, ran into a blinding snowstorm and was obliged to descend.

A Divorce Granted

After many years of patient suffering, you can be divorced from corns, you can get rid of them completely by applying Putnam's Corn Extractor. This wonderful old remedy acts in 24 hours and never fails. Refuse a substitute and remember "Putnam's" is the only Painless Remedy. 25c everywhere.

1920 Fur Catch Worth Two Millions

Muskrat Pelts Account For Half of the Revenue.

During the hunting season of 1920, furs valued at more than two million dollars were sold by Saskatchewan trappers.

Muskrat pelts brought the heaviest revenue, Chief Game Guardian Fred Bradshaw states. Sale of these amounted to \$1,009,476. They sold at \$2 a pelt. Coyote skins were the next heaviest item on the sale list. More than 18,000 of these were sold, bringing a revenue of \$294,176.

One of the surprising features of the statement is that which deals with skunk pelts. It shows that 9,974 of these were sold for \$5 each, bringing returns to trappers amounting to \$49,870.

Other animals which produced good returns for hunters were: Minks, martens, beavers, black and silver foxes, weasels, badgers and Wolverines.

Mr. Bradshaw says: "The most noticeable spread is that of muskrats, there being 380,328 pelts less than were purchased the year before. Beavers are down 500 skins, skunks show an increase of 4,000, and weasels display a remarkable increase of 25,000. All varieties of foxes show a slight decrease, while the remaining kinds of fur bearers show only slight variations from the catch of 1919."

Of the inhabitants of Mexico less than one in three can read or write.

Minard's Liniment for sale everywhere.

Use Cuticura Talcum To Powder and Perfume

An ideal face, skin, baby and dusting powder. Convenient and economical, it takes the place of other perfumes. A few grains add softness to the skin. Sold throughout the Dominion. Canadian Depot: The United Drug Co., Ltd., 100 St. Paul St., W. Montreal. Cuticura Soap always without use.

Driverless Auto Puzzled Police

Ohio Air Service Were Exhibiting Radio Controlled Car.

Dayton traffic policemen rubbed their eyes when a miniature automobile sailed past all semaphores. There was not a soul in it.

It was a driverless radio automobile controlled by a radio in a car 100 feet behind it.

The automobile itself contained no wireless and it is said to be the first of its kind publicly exhibited by the radio air service.

CHOLERA INFANTUM

Cholera infantum is one of the fatal ailments of childhood. It is a trouble that comes on suddenly, especially during the summer months, and unless prompt action is taken the little one may soon be beyond aid. Baby's Own Tablets are an ideal medicine in warding off this trouble. They regulate the bowels and sweeten the stomach and thus prevent all the dreaded summer complaints. Concerning them Mrs. Fred Rose, of South Bay, Ont., says: "I feel Baby's Own Tablets saved the life of our baby when he had cholera infantum and I would not be without them." The Tablets are sold by medicine dealers or in a 25-cent box from The Dr. Williams' Medicine Co., Brockville, Ont.

American Engineers Visit Cranbrook

A party of fifty members of the American Institute of Mining Engineers will visit East Kootenay as the guests of the East Kootenay Prospectors Association and Cranbrook Board of Trade. The party will visit the Sullivan mine and other points of interest.

Minard's Liniment for Burns, etc.

Some schools of mackerel are half a mile wide and twenty miles long and are estimated to contain one million barrels of fish.

"COLD IN THE HEAD"

is an acute attack of Nasal Catarrh. This subject is frequent "cold in the head" will find that the use of HALL'S CATARRH MEDICINE will build up the system and render them less liable to colds. Repeated attacks of Acute Catarrh may lead to Chronic Catarrh. HALL'S CATARRH MEDICINE is taken internally and acts through the blood on the mucous surfaces of the system, thus reducing the inflammation and assisting Nature in restoring normal conditions. All Druggists. Circulars free. F. J. Cheney & Co., Toledo, Ohio.

We are hungry because the cells and tissues all over the body are calling for nourishment, and their call is known as "hunger."

For Rheumatic Pains.—The pains and aches of Sciatica and Rheumatism should be treated with Dr. Thomas' Electric Oil. The soothing and healing properties of this famous remedy have been demonstrated for fifty years. Use it also for inflammatory pains, cuts, scratches, bruises and sprains, either in human beings or the lower animals.

Signor Nitti, Italy's ex-premier, habitually smokes 40 cigarettes and 10 cigars a day.

One of the commonest complaints of infants is worms, and the most effective application for them is Mother Graves' Worm Expeller.

The Brooklyn Bridge towers (New York) are 287 feet in height, the spire of Trinity Church, Broadway, New York City, three feet less, or 284 feet tall.

For Motoring Or Yachting

By Marie Belmont.

There are so many occasions during the summer when a handsome wrap is needed that it is always well to have a coat that may be adapted for various uses. The wrap is made of bolivia cloth, with trimmings of silk serge. The sleeves are cut in one with the rest of the coat and they are distinguished by their wide cuffs. The coat is slightly bloused in the front, but is drawn snugly to the figure below the belt. The draped collar, the cuffs and the hanging pockets are made of blue silk serge that contrasts well with the beige bolivia cloth. Beige stitching enhances their beauty.

The Need of Fresh Air.

Every time we breathe we draw thirty cubic inches of air into our lungs; supposing that we take fifteen breaths a minute for the twenty-four hours of the day, we use no less than 648,000 cubic inches of air, which would weigh over thirty pounds. One day's supply of air for one man being would be sufficient to fill 1,125 two-gallon cans; a year's supply would weigh more than five tons. From these figures it may be seen how necessary it is to keep windows open so that there may be a continuous supply of fresh air.

By making your purchases from your home merchant you are contributing directly to the prosperity of the community in which you live.

Fuel Control Unlikely

Cabinet Considers Situation Calls For No Action.

Fuel control by the Dominion Government during the coming winter is unlikely. According to Sir George Foster, the question of fuel control has been under consideration, but apparently the situation calls for no action by the federal authorities. Sir George pointed out that the Provincial Governments were in a position to appoint fuel controllers if they so desired. Conditions during the war were very different from those prevailing at present, he said, and now there was a supply of fuel for those who wished to purchase it.

CHANGE OF WATER WAS THE CAUSE OF DIARRHOEA

People moving from place to place are very much subject to diarrhoea on account of the change of water, climate, diet, etc. Prompt treatment with DR. FOWLER'S EXTRACT OF WILD STRAWBERRY

in such cases relieves the pain, checks the diarrhoea, and thus does away with the suffering, the weakness and often-times collapse associated with an attack of this kind. It does this by checking the too frequent and irritating stools, settling the stomach and bracing up the weakened system, thus rendering it without a peer for the treatment of all bowel complaints of both old and young.

Mrs. Ernest S. Beaton, Grayburn, Sask., writes:—"Coming out here from the East, my two little girls took very sick, the change of water, etc., giving them diarrhoea. They were so pale, and used to vomit everything they would take, so I finally got a bottle of Dr. Fowler's Extract of Wild Strawberry, and I must say it certainly helped them. I have also used it when my children were teething and it is as you claim for it." 76 years reputation stands behind this remedy. Price, 50c a bottle. Put up only by The T. Milburn Co., Limited, Toronto, Ont.

The Endurance of Your Automobile, Truck, or Tractor

Depends not only upon the time of Lubrication, but the kind of Lubrication.

WHITMORE'S AUTO GEAR PROTECTIVE COMPOSITION

Adds 500% in Gear Life. Thousands of tests have been conducted by Lubricating experts to demonstrate the relative efficiency of various lubricants. The results of these tests conducted over years, has fixed the choice of sixteen leading manufacturers. These manufacturers include:

The largest builder of cars in the world; The largest builder of trucks in the world; The largest builder of axles in the world; The largest builder of worm gears in the world.

Many lubricants contain acid. They not only fail to counteract friction, but are themselves harmful and corrosive to gear and bearing surfaces.

Whitmore's Auto Gear Compositions Contain No Acids

They are proof against heat and cannot break down or sequester out. In the Panama Canal Emergency Plans, 300 million pounds rest on an unbroken film of WHITMORE'S. After an exhaustive test the U.S. Army contracted for its exclusive use. Manufactured by The Whitmore Manufacturing Co., Lubricating Engineers, Cleveland, Ohio.

ATLAS LUMBER Co'y.

BUILD IT NOW

Reconstruct the Old Home For Longer Usefulness

Reconstruction begins at home. If the old house isn't all you desire, and you can't build a new one, a little of the right kind of repairing and remodeling will readily restore it to present day standards.

Perhaps it's a new porch, a summer kitchen, a side entrance, a new roof, extra rooms in the attic or a renewing of old, cracked walls and ceilings that is needed.

The right kind of lumber used in the right way will make the change and we have all the material you will require including that knotty and crackless manufactured lumber Beaver Board, for better walls and ceilings.

Suppose you ask us about it?

Crossfield Garage

LOCAL AND GENERAL

Crossfield School will open on Monday, Sept. 29th.

The Editor and J. H. Whitfield motored to Didsbury, on Wednesday, taking in the Fair, whilst we still think our own Fair has the top place, Didsbury compared favorably in some lines.

Mr. Clarence Casey spent last week-end in town, having come down from Red Deer, where he is working in a Garage.

Mr. and Mrs. A. A. Hall were up to Didsbury, on Tuesday last, Art looked over the cattle at the Fair but he didn't think much of them.

Mr. C. Marston, of Langley Prairie, B. C., is a visitor in town for a few days.

Mrs. Kerr, of Calgary, is visiting her sister Mrs. N. J. Wigle.

Miss Ethel Honor, music teacher of St. Hilda's College, Calgary, was a visitor in town during the week, being the guest of Mr. and Mrs. M. Thomas, and Mr. and Mrs. F. Collicut.

Mr. M. Thomas and Mr. A. W. Gordon left on Wednesday, for Edmonton, where they will interview the Minister of Education with reference to the opening of High school here, and a nice big grant.

Attractive Flower Services were held last Sunday, at Beaver Dam, Inverlea and Crossfield in spite of inclement weather. Most gardens had suffered from hail but a fine collection nevertheless, from all three points was seen at Crossfield Union Church. It was gathered from the gardens of the Farquharson's, Havens', Walsh's, Stauffer's, Arnott's, McRory's, Honeysett's, Swenerton's and Halliday's. The collection from Mrs. Arnott's garden was exceptionally fine. On Monday, the flowers were sent on to the Calgary General Hospital and to Jack Fleming, who is at the Holy Cross Hospital. The following letter of acknowledgment has been received from the General Hospital.

Calgary General Hospital,
Calgary, Aug. 23rd.

Rev. R. K. Swenerton,
Pastor Union Church,
Crossfield, Alta.

Sir:

I beg to acknowledge the receipt of your letter of the 22nd inst., and to say that the Flowers, so kindly contributed by the members of the Union Church, have duly come to hand.

Will you be so good as to convey to the donors our appreciation and thanks for this kind and thoughtful gift to this Hospital.

Yours faithfully
I. E. W. Irving,
Superintendent

The Inverlea Ladies Aid will meet on Thursday, September 1st, at 2.30 p. m., at the home of Mrs. T. Wilson.

5000 Facts About Canada

The annual publication, "5000 Facts about Canada" is a gold mine of information about the Dominion that no Canadian can afford to be without, and its popularity is steadily growing. The 1921 edition is now out and may be had from leading newsdealers or from the Canadian Facts Publishing Co., 585 Huron Street, Toronto, for 80c. per copy. Its compiler, Frank Yeigh, is rendering a public service in thus making available, in accessible and condensed form, under chapter headings, ranging from Agriculture to the Yukon, the story of Canada in a nutshell. It is a revelation of the wonderful wealth and growth of the country, and is, as well, a fine advertisement of the Dominion. Governments, Banks, Boards of Trade and big financial and industrial concerns use hundreds of copies. It is moreover an excellent booklet to send to friends abroad, as a unique cyclo-pedia of Canada.
